PGT Architectural Glass

All PGT Architectural Glass products must be installed within 30 days of delivery to prevent damage from moisture and potential warping. Field glazed units must conform to PGT's Glazing Instructions and GANA, AAMA and IGMA standards. Architectural Glass has prevalent characteristics such as bubbles, discolorations, blurs and scratches. These are expected, as they are inherent qualities that meet or exceed standard specifications for flat glass ASTM C 1036, heat treated flat glass ASTM C 1048 and laminated architectural flat glass ASTM C 1172. Heat strengthened or tempered glass may have distortions as an inherent quality. Glass with special coatings may require special cleaning; follow GANA Glass Informational Bulletins 01-0300 "Proper Procedures for Cleaning Architectural Glass Products" and 02-0402 "Heat-Treated Glass Surfaces are Different" for care and maintenance.

PGT Architectural Laminated Glass Units are warranted to be free of defects resulting in material obstruction of vision or delamination from the date of delivery by PGT. In the event of a material defect, PGT will ship a replacement at no cost (**installation costs are not covered**).
